Forecast for Thursday 11 May 2023

Weather: Any early mist and fog will clear quickly through the morning, leaving sunny spells. Scattered showers will develop into the afternoon, these often heavy and slow-moving, and carrying the risk of thunder. Showers will ease again through the evening, with some clear spells allowing for some patchy mist and fog to form.

Chance of cloud-free hill tops above 800m: 30%, increasing to 70% by late-morning.

Low Cloud and visibility: Low cloud and hill fog, with bases down to around 300-500m early morning, will rise above summits by late-morning. Cloud bases may shroud higher routes in and around heavier showers. Poor or very poor visibility in early mist and fog, becoming very good during the day. Sharp deterioration in any showers to moderate or poor.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Care should be taken if walking in the hills as conditions may deteriorate readily in showers, carrying the risk of thunder and lightning. Gusty in and around any showers, with feels-like temperatures dropping near to freezing across the most exposed tops. Moderate to strong UV levels in sunny spells.

Forecast for Friday 12 May 2023

Weather: A grey start with low cloud, mist and fog, but becoming brighter through the morning. Showers developing into the afternoon, although these lighter and more scattered than previous days. Showers easing later, with clear spells into the evening, allowing for mist and fog to re-develop overnight.

Maximum wind: North-easterly 15-20 mph, with gusts up to 25 mph.

Chance of cloud-free hill tops above 800m: 20% increasing to 80% by late-morning.

Low Cloud and visibility: Low cloud and hill fog, with bases down to around 300-500m early morning, will rise above summits by late-morning. Cloud bases may briefly cover higher routes in any heavier showers, but should remain above summits for most of the day. Poor or very poor visibility in early mist and fog, becoming very good during the day. Sharp deterioration in any showers to moderate or poor.

Temperature: **Valleys:** Plus 9 Celsius rising to plus 17 Celsius.
At 800m: Plus 6 Celsius rising to plus 10 Celsius.
Freezing level: Above all summits.
